## Monday $\mathbf{3 0}^{\text {th }}$ March

## Starter:

- Count to 30 in ones.
- Count back from 30 in ones.
- Count to 30 in twos.
- Count to 30 in fives.

## Today's home learning challenges:

## Sleet challenge

LO: To recognise and understand numbers to 30
Practise recognising and reading numbers to 30 on 100 square.

Make a set of number cards from 0 to 30
Ask an adult to hide your number cards around the room/house for you to find. When you have found them all stick them into your home learning book in order.

## Snow challenge

LO: To find the missing number in a number sentence
Write these number sentences into your home learning book and solve them by counting back from 30 on a number line.
$26+\bigcirc=30$
$15+\bigcirc=30$
$18+\bigcirc=30$
$23+\bigcirc=30$
$12+\bigcirc=30$
$11+\bigcirc=30$

Please ask an older sibling or adult to mark your work with you.
Hail challenge
If 30 is the answer, what is the question? E.g. $\quad 10+8+2=30 \quad 40-10=$
Try to think of interesting ways to do it, using all 4 operations ( $+-\mathrm{x} \div$ )
Hail challenge; please email me your work. I wonder if anyone will think of a way that nobody else has thought of....
